RE: Notification of completion of field work for archaeological and cultural monitoring for construction of Range 11Tango, Pōhakuloa Training Area, Hawai'i Island, Hawai'i.

Contract No. W9128A-05-D-0007, Task Order No. 0003

Dear Mr. Zulick:

Archaeological and cultural monitoring for construction of Range 11Tango (11T) at Pōhakuloa Training Area (PTA), Hawai'i Island is complete as of May 30, 2007. Archaeological and cultural monitoring was conducted for all ground disturbing activity associated with construction of the range to ensure that the construction did not impact archaeological resources. Monitors were on site from January 30, 2007 to May 30, 2007. Leina'ala Benson served as the archaeological monitor while Leiola Mitchell served as the cultural monitor.

Ground disturbing activity included UXO clearance, road widening and maintenance, stockpiling, compacting, grading, and minimal bulldozer pushing. During the course of archaeological monitoring no archaeological sites, features, or cultural material were disturbed. Soil development was poor in the project site, with basalt being the primary material exposed.

In summary, archaeological and cultural monitoring took place for all ground disturbing activity for the construction of Range 11T at PTA. No surface or subsurface cultural resources were disturbed during construction.

If you have any questions, I can be reached at the Garcia and Associates office (262-1387) or by email at wmcelroy@garciaandassociates.com.

Thank you,

Windy McElroy
